

The City of Saint John

May 17, 2022

To All Stakeholders:

This letter is to inform all stakeholders (users) of the City of Saint John General Specifications that the 2022 specification revisions have been completed and the revised document is effective as of May 17, 2022. These revised General Specifications are to be used in conjunction with individual contract specifications and recognized authorities governing safe practices for municipal engineering.

The General Specifications, including the revisions, have been prepared to provide the user with the requirements for bidding and/or working on City of Saint John construction projects. Comments and/or suggestions from users that will assist in enhancing the current General Specifications are welcomed and should be made in writing to Holly Young, P.Eng. It is the intention of City staff to review all comments and/or suggestions received, to consult on those ideas and to consider the submissions for future revisions to the General Specifications document.

The 2022 General Specifications are available online at: www.saintjohn.ca To view or download a copy of the document from the website, select the Tenders and Proposals, and under Related Documents select General Specifications. A list of the sections revised for 2022 is included at the front of the document.

The City of Saint John looks forward to working with you in utilizing this Specification and providing high-quality, cost-effective service to and for the citizens of Saint John.

Yours truly,

Michael Baker, P.Eng.
Director of Engineering / Chief City Engineer

c: City Manager; General Counsel; City Clerk; Purchasing Agent
